Local 798 has invited filmmakers who have been working on capturing the spectrum of ideas around the pipeline industry, including filming the DEP hearings in Lancaster, PA. They hope to show Local 798's efforts to foster better understanding of workers' needs and beliefs, and that there are multiple sides to environmental stories. Anyone who does not want to appear on camera can let the filmmakers know before the meeting starts and they will not be included. This will be part of a larger project trying to capture the many voices of the American people outside of the political sphere in the year 2017. They look forward to hearing what you all have to say.

The afternoon will include door prizes, food, fellowship, and important information about Local Union business and the industry. Members, their families, and friends of the industry are all welcome to attend. We look forward to seeing you all there!
